· Art Unit: 2122

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372:

Group I, claim(s) 1-15 and 18-22 drawn to a method of generating a delta between a first and second program binary for the purposes of updating the first program binary, classified in class 717, subclass 168.

Group II, claim(s) 16-17 drawn to a specific method of matching blocks between a first control flow graph and a second control flow graph by computing register flows for each block, classified in class 717, subclasses 132 and/or 156.

- 2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I is a general method of generating a delta between a first and second program binary, whereas invention II is a specific method for generating a delta by matching blocks in control flow graphs using register flows. The subcombination has separate utility such as determining differences between two control flow graphs using register flows.
- 3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

• Art Unit: 2122

- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5. A telephone call was made to Kasey Christie on November 24th, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth A Gross whose telephone number is (703) 305-0542. The examiner can normally be reached on Mon-Fri 7:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tuan Q Dam can be reached on (703) 305-4552. The fax phone number for the organization where this application or proceeding is assigned is (703) 746-7239.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
